

From draft -> review -> publish -> feedback loop.

Inputs

- Curriculum blueprint with module objectives and prerequisites.
- Assets: text, diagrams, code examples, exercises, solutions.

Process

- Draft: build module with 3 worked examples and exercises (easy/medium/hard).
- Review: technical correctness + pedagogy review + accessibility pass.
- Publish: webpage + downloadable notes + feedback form.
- Iterate: incorporate feedback into the next release cycle.

Quality checklist

- Objectives are testable; exercises force transfer.
- Examples connect to real artifacts in Research and/or tools.
- Links work; citations are consistent; diagrams are readable.
